Turnovers/G (OFF lost / DEF forced)	#73	#122

THE READ Up front, the stuff-rate and sack numbers are close to even -- this one likely comes down to who wins on the perimeter instead of at the line of scrimmage. The clearest real edge on the sheet is Off Points/Game, which favors Troy -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Troy 33.1-24.7 over Southern Mississippi (65% win probability), a projected margin of 8.4. On the ground, Troy's rush offense (219.0 yds/g) lines up against Southern Mississippi's rush defense (318.5 yds/g allowed) -- edge Troy. Through the air, Southern Mississippi's pass offense (282.8 yds/g) faces Troy's pass defense (269.0 yds/g allowed) -- edge Southern Mississippi. Troy also carries the turnover-margin edge (+0.3 vs -1.3). Heads up: Southern Mississippi does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Troy's home-field rating (-2.7).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

JACKSONVILLE ST at KENNESAW STATE

Wed, Oct 7 | Jacksonville St (3-2) @ Kennesaw State (1-3) | Strength of Record: Jacksonville St #99, Kennesaw State #116
Offensive identity: Jacksonville St 41% pass / 59% run | Kennesaw State 51% pass / 49% run

TFL/G (OFF allowed / DEF made)	#30	#36
Turnovers/G (OFF lost / DEF forced)	#12	#102

THE READ Up front, Jacksonville St wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Jacksonville St -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Kennesaw State 22.9-22.5 over Jacksonville St (51% win probability), a projected margin of 0.5. On the ground, Jacksonville St's rush offense (157.5 yds/g) lines up against Kennesaw State's rush defense (205.7 yds/g allowed) -- edge Jacksonville St. Through the air, Jacksonville St's pass offense (201.5 yds/g) faces Kennesaw State's pass defense (225.0 yds/g allowed) -- edge Jacksonville St. Kennesaw State also carries the turnover-margin edge (+0.3 vs -0.8). **Caution: without Kennesaw State's +6.3-point home-field edge, the underlying stat blend alone actually favors Jacksonville St.**

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Kennesaw State's home-field rating (+6.3).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

TFL/G (OFF allowed / DEF made)	#35	#101
Turnovers/G (OFF lost / DEF forced)	#43	#13

THE READ Up front, S Alabama wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors S Alabama -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Arkansas State 31.7-25.8 over S Alabama (61% win probability), a projected margin of 5.9. On the ground, S Alabama's rush offense (196.3 yds/g) lines up against Arkansas State's rush defense (228.5 yds/g allowed) -- edge S Alabama. Through the air, S Alabama's pass offense (268.8 yds/g) faces Arkansas State's pass defense (209.5 yds/g allowed) -- edge S Alabama. **Caution: without Arkansas State's +9.8-point home-field edge, the underlying stat blend alone actually favors S Alabama.**

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Arkansas State's home-field rating (+9.8).

THE READ Up front, Florida State wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Louisville -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Louisville 32.9-29.6 over Florida State (56% win probability), a projected margin of 3.3. On the ground, Florida State's rush offense (197.8 yds/g) lines up against Louisville's rush defense (176.5 yds/g allowed) -- edge Florida State. Through the air, Louisville's pass offense (265.5 yds/g) faces Florida State's pass defense (297.5 yds/g allowed) -- edge Louisville. Louisville also carries the turnover-margin edge (+0.8 vs -0.3). **Caution: without Louisville's +4.9-point home-field edge, the underlying stat blend alone actually favors Florida State.**

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96; R²=0.77, MAE=8.0 pts, in-sample). Home-field: Louisville's home-field rating (+4.9).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

THE READ Up front, the stuff-rate and sack numbers are close to even -- this one likely comes down to who wins on the perimeter instead of at the line of scrimmage. The clearest real edge on the sheet is Off Points/Game, which favors San Jose State -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Wyoming 21.1-20.9 over San Jose State (50% win probability), a projected margin of 0.2. On the ground, San Jose State's rush offense (102.0 yds/g) lines up against Wyoming's rush defense (203.8 yds/g allowed) -- edge San Jose State. Through the air, San Jose State's pass offense (260.0 yds/g) faces Wyoming's pass defense (171.8 yds/g allowed) -- edge San Jose State. San Jose State also carries the turnover-margin edge (-0.5 vs -1.5). **Caution: without San Jose State's -8.0-point home-field edge, the underlying stat blend alone actually favors San Jose State.**

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96; R²=0.77, MAE=8.0 pts, in-sample). Home-field: San Jose State's home-field rating (-8.0).

THE READ Up front, Indiana wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Nebraska -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Indiana 35.5-23.0 over Nebraska (72% win probability), a projected margin of 12.6. On the ground, Indiana's rush offense (241.8 yds/g) lines up against Nebraska's rush defense (101.0 yds/g allowed) -- edge Indiana. Through the air, Nebraska's pass offense (251.8 yds/g) faces Indiana's pass defense (205.8 yds/g allowed) -- edge Nebraska. Nebraska also carries the turnover-margin edge (+1.5 vs +0.5). Heads up: Nebraska does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Nebraska's home-field rating (-4.1).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

TFL/G (OFF allowed / DEF made)	#56	#91
Turnovers/G (OFF lost / DEF forced)	#1	#61

THE READ Up front, Missouri wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Missouri -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Missouri 28.2-24.5 over Texas A&M; (57% win probability), a projected margin of 3.6. On the ground, Missouri's rush offense (159.5 yds/g) lines up against Texas A&M;'s rush defense (121.0 yds/g allowed) -- edge Missouri. Through the air, Missouri's pass offense (258.8 yds/g) faces Texas A&M;'s pass defense (191.8 yds/g allowed) -- edge Missouri. Heads up: Missouri does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Missouri's home-field rating (+3.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

TFL/G (OFF allowed / DEF made)	#42	#20
Turnovers/G (OFF lost / DEF forced)	#113	#95

THE READ Up front, the stuff-rate and sack numbers are close to even -- this one likely comes down to who wins on the perimeter instead of at the line of scrimmage. The clearest real edge on the sheet is Off Points/Game, which favors Wake Forest -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors North Carolina State 30.8-28.9 over Wake Forest (54% win probability), a projected margin of 2.0. On the ground, Wake Forest's rush offense (157.0 yds/g) lines up against North Carolina State's rush defense (170.8 yds/g allowed) -- edge Wake Forest. Through the air, Wake Forest's pass offense (288.0 yds/g) faces North Carolina State's pass defense (250.8 yds/g allowed) -- edge Wake Forest. **Caution: without North Carolina State's +12.0-point home-field edge, the underlying stat blend alone actually favors Wake Forest.**

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: North Carolina State's home-field rating (+12.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

The clearest real edge on the sheet is Off Points/Game, which favors Bowling Green -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Bowling Green 28.1-18.0 over Sacramento State (68% win probability), a projected margin of 10.1. On the ground, Sacramento State's rush offense (88.3 yds/g) lines up against Bowling Green's rush defense (224.8 yds/g allowed) -- edge Sacramento State. Through the air, Bowling Green's pass offense (151.8 yds/g) faces Sacramento State's pass defense (234.8 yds/g allowed) -- edge Bowling Green. Bowling Green also carries the turnover-margin edge (+0.0 vs -2.0). Heads up: Bowling Green does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware. **Caution: both F+ and FEI favor Bowling Green, the opposite of the model's own pick above.**

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Bowling Green's home-field rating (+5.2).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

BALL STATE at NORTHWESTERN

Sat, Oct 10 | Ball State (1-4) @ Northwestern (3-1) | Strength of Record: Ball State #126, Northwestern #19

THE READ Up front, the stuff-rate and sack numbers are close to even -- this one likely comes down to who wins on the perimeter instead of at the line of scrimmage. The clearest real edge on the sheet is Off Points/Game, which favors Northwestern -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Northwestern 53.4-0.0 over Ball State (98% win probability), a projected margin of 53.9. On the ground, Northwestern's rush offense (209.0 yds/g) lines up against Ball State's rush defense (241.5 yds/g allowed) -- edge Northwestern. Through the air, Northwestern's pass offense (209.0 yds/g) faces Ball State's pass defense (268.0 yds/g allowed) -- edge Northwestern. Northwestern also carries the turnover-margin edge (+1.3 vs -0.8).

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Northwestern's home-field rating (+12.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

SOUTH CAROLINA at FLORIDA

TFL/G (OFF allowed / DEF made)	#93	#72
Turnovers/G (OFF lost / DEF forced)	#12	#113

THE READ Up front, South Carolina wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Florida -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Florida 46.2-26.4 over South Carolina (81% win probability), a projected margin of 19.8. On the ground, South Carolina's rush offense (218.8 yds/g) lines up against Florida's rush defense (142.5 yds/g allowed) -- edge South Carolina. Through the air, South Carolina's pass offense (269.5 yds/g) faces Florida's pass defense (296.3 yds/g allowed) -- edge South Carolina. Florida also carries the turnover-margin edge (+1.0 vs -1.0).

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Florida's home-field rating (+12.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

THE READ Up front, Appalachian State wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Appalachian State -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Appalachian State 37.2-18.6 over Old Dominion (80% win probability), a projected margin of 18.6. On the ground, Appalachian State's rush offense (93.3 yds/g) lines up against Old Dominion's rush defense (152.8 yds/g allowed) -- edge Appalachian State. Through the air, Appalachian State's pass offense (309.7 yds/g) faces Old Dominion's pass defense (239.0 yds/g allowed) -- edge Appalachian State. Appalachian State also carries the turnover-margin edge (+1.0 vs -0.8). Heads up: Old Dominion does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Appalachian State's home-field rating (+0.8).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

Turnovers/G (OFF lost / DEF forced)	#102	#122

THE READ Up front, the stuff-rate and sack numbers are close to even -- this one likely comes down to who wins on the perimeter instead of at the line of scrimmage. The clearest real edge on the sheet is Off Points/Game, which favors Mississippi -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Mississippi 40.5-19.6 over Vanderbilt (82% win probability), a projected margin of 20.9. On the ground, Vanderbilt's rush offense (107.3 yds/g) lines up against Mississippi's rush defense (194.8 yds/g allowed) -- edge Vanderbilt. Through the air, Mississippi's pass offense (322.5 yds/g) faces Vanderbilt's pass defense (238.8 yds/g allowed) -- edge Mississippi. Heads up: Vanderbilt does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Vanderbilt's home-field rating (-7.8).

UCLA at OREGON

TFL/G (OFF allowed / DEF made)	#56	#65
Turnovers/G (OFF lost / DEF forced)	#12	#1

THE READ Up front, UCLA wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors UCLA -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Oregon 37.5-27.4 over UCLA (68% win probability), a projected margin of 10.1. On the ground, UCLA's rush offense (281.5 yds/g) lines up against Oregon's rush defense (150.0 yds/g allowed) -- edge UCLA. Through the air, Oregon's pass offense (311.7 yds/g) faces UCLA's pass defense (225.8 yds/g allowed) -- edge Oregon. UCLA also carries the turnover-margin edge (+0.3 vs +2.0). **Caution: without Oregon's +12.0-point home-field edge, the underlying stat blend alone actually favors UCLA. Caution: both F+ and FEI favor Oregon, the opposite of the model's own pick above.**

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Oregon's home-field rating (+12.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

TFL/G (OFF allowed / DEF made)	#70	#65
Turnovers/G (OFF lost / DEF forced)	#117	#69

THE READ Up front, North Texas wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors North Texas -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors North Texas 53.3-8.8 over Charlotte (96% win probability), a projected margin of 44.5. On the ground, North Texas's rush offense (168.8 yds/g) lines up against Charlotte's rush defense (159.5 yds/g allowed) -- edge North Texas. Through the air, North Texas's pass offense (325.0 yds/g) faces Charlotte's pass defense (295.8 yds/g allowed) -- edge North Texas. North Texas also carries the turnover-margin edge (-0.5 vs -1.5).

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: North Texas's home-field rating (+12.0).

THE READ Up front, Tulsa wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Tulsa -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Navy 25.8-22.1 over Tulsa (57% win probability), a projected margin of 3.6. On the ground, Navy's rush offense (201.7 yds/g) lines up against Tulsa's rush defense (135.3 yds/g allowed) -- edge Navy. Through the air, Navy's pass offense (131.3 yds/g) faces Tulsa's pass defense (299.5 yds/g allowed) -- edge Navy. Tulsa also carries the turnover-margin edge (-0.7 vs +1.5). **Caution: without Navy's +11.8-point home-field edge, the underlying stat blend alone actually favors Tulsa.** Heads up: Tulsa does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Navy's home-field rating (+11.8).

TFL/G (OFF allowed / DEF made)	#93	#124
Turnovers/G (OFF lost / DEF forced)	#127	#22

THE READ Up front, Eastern Michigan wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Eastern Michigan -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Eastern Michigan 26.5-24.6 over Akron (54% win probability), a projected margin of 2.0. On the ground, Eastern Michigan's rush offense (106.2 yds/g) lines up against Akron's rush defense (232.3 yds/g allowed) -- edge Eastern Michigan. Through the air, Akron's pass offense (175.8 yds/g) faces Eastern Michigan's pass defense (264.8 yds/g allowed) -- edge Akron. Eastern Michigan also carries the turnover-margin edge (-1.5 vs +0.4).

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Akron's home-field rating (+7.9).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

Turnovers/G (OFF lost / DEF forced)	#43	#69

THE READ Up front, Rice wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors East Carolina -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors East Carolina 28.4-20.1 over Rice (65% win probability), a projected margin of 8.2. On the ground, Rice's rush offense (190.3 yds/g) lines up against East Carolina's rush defense (178.3 yds/g allowed) -- edge Rice. Through the air, East Carolina's pass offense (164.3 yds/g) faces Rice's pass defense (208.5 yds/g allowed) -- edge East Carolina.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: East Carolina's home-field rating (+3.2).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

MARYLAND at OHIO STATE

Sacks/G (OFF allowed / DEF made)	#72	#95
TFL/G (OFF allowed / DEF made)	#54	#96
Turnovers/G (OFF lost / DEF forced)	#35	#69

THE READ Up front, Maryland wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Ohio State -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Ohio State 45.8-11.7 over Maryland (93% win probability), a projected margin of 34.1. On the ground, Ohio State's rush offense (157.6 yds/g) lines up against Maryland's rush defense (168.3 yds/g allowed) -- edge Ohio State. Through the air, Ohio State's pass offense (357.0 yds/g) faces Maryland's pass defense (229.3 yds/g allowed) -- edge Ohio State. Ohio State also carries the turnover-margin edge (+0.8 vs -0.8). Heads up: Maryland does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Ohio State's home-field rating (-2.1).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

Turnovers/G (OFF lost / DEF forced)	#127	#69

THE READ Up front, Nevada wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Nevada -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Nevada 36.3-22.1 over UTEP (74% win probability), a projected margin of 14.1. On the ground, Nevada's rush offense (201.7 yds/g) lines up against UTEP's rush defense (183.8 yds/g allowed) -- edge Nevada. Through the air, Nevada's pass offense (190.7 yds/g) faces UTEP's pass defense (260.0 yds/g allowed) -- edge Nevada.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: UTEP's home-field rating (+12.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

NORTH DAKOTA STATE at UNLV

THE READ Up front, the stuff-rate and sack numbers are close to even -- this one likely comes down to who wins on the perimeter instead of at the line of scrimmage. The clearest real edge on the sheet is Off Points/Game, which favors North Dakota State -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors UNLV 23.5-23.2 over North Dakota State (50% win probability), a projected margin of 0.2. On the ground, North Dakota State's rush offense (181.8 yds/g) lines up against UNLV's rush defense (134.4 yds/g allowed) -- edge North Dakota State. Through the air, North Dakota State's pass offense (197.3 yds/g) faces UNLV's pass defense (249.8 yds/g allowed) -- edge North Dakota State. **Caution: without UNLV's +9.0-point home-field edge, the underlying stat blend alone actually favors North Dakota State.** Heads up: UNLV does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: UNLV's home-field rating (+9.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

THE READ Up front, the stuff-rate and sack numbers are close to even -- this one likely comes down to who wins on the perimeter instead of at the line of scrimmage. The clearest real edge on the sheet is Off Points/Game, which favors USC -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Penn State 33.3-22.1 over USC (70% win probability), a projected margin of 11.1. On the ground, USC's rush offense (156.2 yds/g) lines up against Penn State's rush defense (173.2 yds/g allowed) -- edge USC. Through the air, Penn State's pass offense (243.6 yds/g) faces USC's pass defense (230.7 yds/g allowed) -- edge Penn State. Penn State also carries the turnover-margin edge (+1.2 vs -0.2). **Caution: without Penn State's +12.0-point home-field edge, the underlying stat blend alone actually favors USC.**

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Penn State's home-field rating (+12.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

THE READ Up front, Air Force wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Air Force -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Air Force 38.7-12.9 over N Illinois (87% win probability), a projected margin of 25.8. On the ground, Air Force's rush offense (252.7 yds/g) lines up against N Illinois's rush defense (172.3 yds/g allowed) -- edge Air Force. Through the air, N Illinois's pass offense (229.3 yds/g) faces Air Force's pass defense (198.3 yds/g allowed) -- edge N Illinois.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: N Illinois's home-field rating (-8.0).

THE READ Up front, James Madison wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors James Madison -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors James Madison 29.4-22.2 over Georgia So (63% win probability), a projected margin of 7.1. On the ground, James Madison's rush offense (204.0 yds/g) lines up against Georgia So's rush defense (150.5 yds/g allowed) -- edge James Madison. Through the air, Georgia So's pass offense (240.3 yds/g) faces James Madison's pass defense (252.3 yds/g allowed) -- edge Georgia So.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Georgia So's home-field rating (+8.1).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).

THE READ Up front, Louisiana wins the line of scrimmage on our stuff-rate and sack numbers above -- expect this one to be a smash-mouth, grind-it-out fight, yards coming in small chunks between the tackles. The clearest real edge on the sheet is Off Points/Game, which favors Louisiana -- in our own 95 logged games, the team with the better Off Points/Game has won 78% of the time. Projection favors Louisiana Tech 30.5-23.2 over Louisiana (63% win probability), a projected margin of 7.3. On the ground, Louisiana's rush offense (188.8 yds/g) lines up against Louisiana Tech's rush defense (194.0 yds/g allowed) -- edge Louisiana. Through the air, Louisiana's pass offense (166.3 yds/g) faces Louisiana Tech's pass defense (261.7 yds/g allowed) -- edge Louisiana. **Caution: without Louisiana Tech's +12.0-point home-field edge, the underlying stat blend alone actually favors Louisiana.** Heads up: Louisiana Tech does have the better Def Sacks/Game number in this game, which runs against the model's own pick above (in our logged games, the model hits 93.8% when Def Sacks/Game agrees with its pick, 87.5% when it doesn't) -- be aware.

Real backtested margin model: FPI +0.29/pt, Efficiency +0.59/pt, Scoring +0.62/pt, Yardage +0.43/pt, Turnovers -0.09/pt (real OLS fit, n=96, R²=0.77, MAE=8.0 pts, in-sample). Home-field: Louisiana Tech's home-field rating (+12.0).

Ranks only, #1 = best for that unit. Purple = top 10% nationally, green = strong, red = poor. OFF = what that offense produced; DEF = the same stat on the offenses it faced (allowed / made / forced). Stats are each team's season average vs FBS opponents only; the 'g' counts show how many games that is. Rush/pass blocks rank FBS yards per game. Red zone % is not split. Yellow highlight in THE READ = F+ and FEI both favor the team opposite the model's pick; win rates are recomputed each run from cfb_stat_history.json (see cfb_matrices_outlook.pdf).
